PROFESSIONAL PROFILE SUMMARY

Motivated and detail-oriented Information Technology student and IT Support Specialist with hands-on experience in workstation administration, user training, and network troubleshooting. Demonstrates a strong practical foundation in C and Python programming, version control with Git/GitHub, and system administration principles. Proven track record in customer-facing technical support and leadership, adept at resolving hardware/software issues and conveying technical concepts clearly to non-technical users. Seeking an IT Support Specialist or Junior Software Developer role to leverage technical problem-solving and support expertise.

TECHNICAL SKILLS & COMPETENCIES

- **Technical Support & Systems:** Workstation Maintenance, OS Installation & Configuration (Windows/Linux), Peripheral Configuration, Basic Hardware Repair, Network Setup & Connectivity Troubleshooting.
- **Programming Languages:** C (Data Structures, Control Flow, Structs, Memory Management), Python (Scripting & Automation), C++, JavaScript, HTML/CSS.
- **Version Control & Tools:** Git, GitHub (Repository Administration, Markdown Documentation), Google Cloud / Developer Program Tools, MyLOFT e-Library Administration.
- **Soft Skills:** End-User Training, Technical Documentation, Customer Service, Problem Solving, Communication, Leadership & Team Collaboration.

TECHNICAL PROJECTS

Personal Developer Portfolio Website

- Designed and deployed a responsive personal portfolio website showcasing technical projects, skill sets, and downloadable CV integration.
- Implemented clean HTML/CSS/JavaScript structure and version-controlled codebase on GitHub.

C-Based Banking Qualification System

- Developed a standalone CLI application in C to assess customer bank account eligibility using structured conditional logic, age/income thresholds, and modular functions.

GitHub Repository Portfolio

- Maintained structured open-source project repositories with comprehensive README documentation, Git branching, and commit history.

WORK EXPERIENCE

Cyber Attendant & Computer Trainer

BH & Junction Cyber and Computer Training | *December 2025 – Present*

- Provide Tier 1 technical support and system administration for multi-workstation cyber cafe operations, ensuring 99%+ uptime for hardware, printing, scanning, and local network infrastructure.
- Deliver structured one-on-one and group computer literacy training to clients, covering operating systems, office software, and internet safety.
- Troubleshoot client OS configuration errors, network connectivity issues, and software installation problems under fast-paced operational constraints.
- Assist clients with digital submission processes, document formatting, and web service navigation with high accuracy and customer satisfaction.
